## 5.3 " Rail Transportation and Pipelines

Modern freight trains average roughly 73 cars but top train length is 200 cars and growing , whereas the average freight train length in 1929 was 48 cars. Across the United States, 25% of the whole corn crop went to ethanol in 2007. Society has always depended on its systems of transport.

### Rail transportation in the United States

The trend has thus been towards a specialization of freight wagons, such as hopper wagons grain, potash, and fertilizers , triple hopper wagons sand, gravel, sulfur, and coal , flat wagons wood, agricultural equipment, manufactured goods, containers , tanker wagons petrochemical products , box wagons livestock, paper, manufactured goods, refrigerated goods , car wagons and passengers wagons first class, second class, third class cabins, sleeper cars, restaurant cars. This policy helps to reduce accidents and save lives. Olomana in the foreground Although sugarcane had been grown in Hawaii since the early 1800s, the first export of sugar did not occur until 1837.

### Amtrak Routes & Stations

The growth of this mail distribution network paralleled the expansion of the railroads, allowing mail to be exchanged between routes at junction points where two railroads crossed or shared passenger terminals. Furthermore, Fogel does not discuss the role railroads played in the development of the financial system or in attracting foreign capital, which otherwise might not have been available.

### Rail Transportation

The main competition came from canals, many of which were in operation under state ownership, and from privately owned steamboats plying the nation's vast river system. The carbody was made of in 1934, it is seen here at the in in 2003. Most of us take transportation for granted.

### Rail Transportation in the US

The money will also be used build new stations and platforms.
