Agriculture and Economic Growth

The noted economist Yair Mundlak presents here a theory of the growth of the agricultural sector within the context of a growing economy.

A Look at Agricultural Productivity Growth in the United States, 1948

Between 1948 and 2017, labor and land inputs declined by 76 and 28 percent, respectively, while intermediate goods, such as energy, agricultural chemicals, purchased services, and other materials grew by 133 percent. He explores the various aspects of the dynamics of agriculture and their relationship to the dynamics of the economy at large, offering a unique blend of theory, methodology, and empirical analysis. Thus, the release of surplus manpower from the agricultural sector is necessary for the progress of agricultural sector and for expanding the non-agricultural sector.

The Role of Agriculture in Economic Growth and Development on JSTOR

Kinderberger, Todaro, Lewis and Nurkse etc. Helpful in Phasing out Economic Depression: During depression, industrial production can be stopped or reduced but agricultural production continues as it produces basic necessities of life. Improving Rural Welfare: It is time that rural economy depends on agriculture and allied occupations in an underdeveloped country.

Economic Growth & Agriculture

Generally, landless workers and marginal farmers are engaged in non-agricultural jobs like handicrafts, furniture, textiles, leather, metal work, processing industries, and in other service sectors. It has already made a significant contribution to the economic prosperity of advanced countries and its role in the economic development of less developed countries is of vital importance.

Forged from a partnership between a university press and a library, Project MUSE is a trusted part of the academic and scholarly community it serves.

Project MUSE

The rising agricultural surplus caused by increasing agricultural production and productivity tends to improve social welfare, particularly in rural areas. **HIGHLIGHT** Through its partnership with the Government of Pakistan, USAID is stimulating private sector investment to increase sales, incomes, and jobs; promoting a vibrant and profitable agricultural sector through market linkages, technology adoption, and access to irrigation water; fostering a business-enabling environment for sustainable economic development; and facilitating trade across borders to increase regional connectivity.

Agriculture and Economic Growth: Theory and Measurement

Contribution to National Income: The lessons drawn from the economic history of many advanced countries tell us that agricultural prosperity contributed considerably in fostering economic advancement. Agricultural progress permits the shift of manpower from agricultural to non-agricultural sector.

Economic Growth & Agriculture

Jul 29, 2021 USDA Economic Research Service using data compiled from the National Productivity data series, 1948-2017. In underdeveloped countries, it is well known that the majority of people depend upon agriculture and it is they who must be able to afford to consume the goods produced. As a result, more than 211,000 individuals have applied improved technologies and farming management practices on nearly 367,000 hectares.
