Relationship Assessment Scale (RAS)

Psychological Medicine, 42 7 , 1343-57.

Vanguard

First, we need to determine if a treatment is even needed.

CEBC » Program » Interpersonal Psychotherapy

Data demonstrate the ability of this cutoff score to discriminate between adolescents with Major Depressive Disorder and an age- and gender-matched control group.

CAD

Length of postintervention follow-up: 6 months.

Module 3: Clinical Assessment, Diagnosis, and Treatment

In the context of psychopathology, behavior modification can be useful in treating phobias, reducing habit disorders, and ridding the person of maladaptive cognitions.

CEBC » Program » Interpersonal Psychotherapy

It may be administered individually or in groups, large and small. Limitations include reliance on self-reported measures, duration of the WLC condition was significantly shorter than the treatment time therefore a comparison of the full effects of treatment versus no treatment was not

possible, and exclusion of patients receiving concomitant treatment and those using antidepressant medications which may reduce generalizability to the whole population of treatment-seeking depressed patients. Length of postintervention follow-up: 18 months.

Skills Training in Affective and Interpersonal Regulation (STAIR)

The six RADS-2 critical items are those that have been identified as being most predictive of a depressive disorder diagnosis. In another study, published in 2006 in the Journal of Consulting and Clinical Psychology, 88% of therapy-goers reported improvements after just one session.

Psyc Assessment: SNL's Blog Thing: Assessments of Interpersonal Relationships

After the naming of a DSM-5 Task Force Chair and Vice-Chair in 2006, task force members were selected and approved by 2007, and workgroup members were approved in 2008. Length of postintervention follow-up: Within two weeks. Women assigned to the WLC group experienced little improvement over 12 weeks reduction in symptoms based on the HRSD and BDI, respectively, suggesting that recovery without treatment occurs slowly.
