Methods for calculation of per capita alcohol consumption in a Muslim majority country with a very low drinking level: Findings from the 2011 Iranian mental health survey

Vancouver: British Columbia Centre of Excellence for Women's Health. A Canadian study of drug dealers on probation provided an updated view of the frequent use of violence in the context of the drug trade. As such, the current Summary of Results for 2011 presents data from the latest CADUMS with a comparison to 2010 and to estimates from the Canadian Addiction Survey CAS of 2004 to identify any changes that have taken place in the past 7 years.

Substance use and abuse among college students: a review of recent literature

Further, an interaction between self-reported popularity and social distancing—related reputation concerns predicted face-to-face substance use with friends. According to some studies in France, statistics on arrests of drug users must be used with caution, as it is difficult to determine with any certainty the extent to which observed changes reflect changes in the drug user population and whether the changes are in fact linked to changes in police and gendarmerie activities.

Women and Substance Abuse Problems

As there has not been recent or adequate surveillance specific to substance use by Canadians, cross-sectional data from the Canadian Community Health Survey CCHS Cycle 1.

The Epidemiology of Cocaine and Opiate Abuse in Urban Canada

For the 2011 calendar year, the final sample was 10,076 respondents, representing approximately 25,957,435 Canadians aged 15 and older. In 2011, the prevalence of past-year cannabis use by youth was 21.

Canadian Alcohol and Drug Use Monitoring Survey

CIHI ; all aspects of the standardization in data collection must be addressed e. Thus, they may be engaging in substance use with their friends via video chat, text, or by posting to social networking sites.

Women and Substance Abuse Problems

The most widely used drugs other than cannabis were alcohol and tobacco, but most had also used other illicit drugs in their lifetime. According to Brochu, many users prefer to stop using drugs rather than get involved in crime, and few fall into a form of crime that conflicts with their basic moral values e. Drug Laws and Trafficking Patterns in Canada.

Substance use and abuse among college students: a review of recent literature

The number of hospital separations per 100,000 population has remained fairly stable between 1991—1992 and 1995—1996 for women and men. Differences by sex, age and Aboriginal status were explored.
