Questionnaires administered to 120 members of the Jamaican national team and 125 controls elicited information on place of birth, language, ethnicity, and distance and method of travel to school. Surprisingly, there is as much relative variation in the share for poor countries as for rich ones, and even more relative variation in amounts in US dollars. We employed the concentration indices and the horizontal inequity index proposed by Wagstaff and van Doorslaer based on one- and two-part models.

**Osteoarthritis in adults by selected demographic characteristics, United States, 1960**

Medium-term projections of national health spending to 2025 were provided based on macroeconomic budgetary excess growth model. We accessed the data of a multistage stratified random sample of 7279 adult participants, aged between 18 and 59 years, as well as 1018 participants aged above 60 years, from the first round of the Tanzania National Panel survey. As more emphasis is placed on health care value and quality, this area of research will become increasingly needed and critical questions should be asked about what we value in health care and whether we can find a balance between patient satisfaction, outcomes, and expenditures.

Although appendicitis has a seasonal variation, other environmental factors and impact of nutritional habit should not be ignored.

**Health and Disease in the United States, Annual Review of Public Health**

Rapid growth in national health expenditures is projected to continue through 1990.

**Osteoarthritis in adults by selected demographic characteristics, United States, 1960**

Women with secondary PVD reported significantly more clitoral hood pain, higher overall vestibular pain levels, more overall sexual dysfunction and sex-related distress, and proportionately more intercourse occasions that were painful. Extensive colitis was positively associated with male gender, diarrhea, weight loss, and a younger age at diagnosis. Results indicated that self-employed veterans were older and more educated and more likely to utilize VA healthcare.
