**Northern Goshawk laingi subspecies (Accipiter gentilis laingi): recovery strategy 2018**

OWNGROUP CODED IN ACCORDANCE WITH DOCUMENTATION IN RECORD TYPE 1. Federal lands are owned by the US government and National Forests are managed by the US Forest Service, which

Filesize: 68.910 MB

is a division of the larger US Department of Agriculture. McNulty 2017-01-01 Forests provide various ecosystem services related to air quality that can provide substantial value to society.

## Northern Goshawk laingi subspecies (Accipiter gentilis laingi): recovery strategy 2018

Growing space availability had a weak relationship with regeneration and growth. The digital MSS data were utilized to devise quantitative indices which correlate with apparently stable and seral aspen forests.

## Third U.S. Geological Survey Wildland Fire

It noted progressive loss of forests in the study area between 1975 and 2009 through 1990 and predicted that, unless checked, the area is in for further depletion of the invaluable climax forests in the region, especially sal and moist deciduous forests. Thanks to John Deal Western Forest Products for his photos of the Northern Goshawk laingi subspecies used in this report.

## **Forest Cover Types & Communities**

The mean annual temperature of the area is 4. Upward water-level trends were most often measured for wells screened in the PRM aquifer system.
