

# Polish/U.S. Symposium on Wastewater Treatment and Sludge Disposal, February 10-12, 1976

Environmental Protection Agency, Environmental Research Center - Studies on the recovery of sludge protein

Description: -

-

Popular music -- France -- 20th century -- History and criticism

Singers -- France -- Biography.

Piaf, Edith, -- 1915-1963.

Lebanon -- History -- 20th century.

Confectioners -- Lebanon -- Sidon -- Biography.

Sanyūrah, 'Abd al-Bāsīt, -- 1904-2002

Tax credits -- Law and legislation -- Chile -- Cases.

Value-added tax -- Law and legislation -- Chile -- Cases.

Sewage disposal -- Poland -- Congresses

Sewage disposal -- United States -- Congresses

Factory and trade waste -- Poland -- Congresses

Factory and trade waste -- United States -- Congresses

## US4915840A

Salt removal from membrane retentate Even after removal of most of the organic matter from retentate, high concentrations of inorganic ions may render the water unsuitable for re-use or for discharge to the environment.

## US5531898A

Conditions in the sidestream that are conducive to growing bacteria capable of performing this process is maintained in the sidestream. A more detailed comparison of all the results from this chapter will be presented in the Discussion.

## US5531898A

While the speed of the induced draft fan 190 can be varied by a device such as a variable frequency drive operated to create varying levels of negative pressure within the fluid scrubber 122 and thus can usually be operated within a range of gas flow capacity to assure complete gas flow from the flare 130, if the gas being produced by the flare 130 is not of sufficient quantity, the operation of the induced draft fan 190 cannot necessarily be adjusted to assure a proper pressure drop across the fluid scrubber 122 itself. The wastewater stream may be generated during the processing of one of the group consisting of wood, pulp, paper, chemicals, petrochemicals, pharmaceuticals, textiles, glues, foodstuffs, milk, coffee, eggs, meat, beef, chicken, fish, beer and wine.

## US9296624B2

On the positive side, the industry is based on the usage of renewable, photosynthetic resources. Some review articles have focused on strategies to minimize or delay fouling Le-Clech et al. The remainder of the raw sewage is then treated to become acceptable to reintroduce to the environment.
