Key Actions and Documents NOAA Fisheries scientists are leading the effort to answer key questions about the risk factors potentially affecting killer whales, with a special focus on the Southern Resident population.

Ohio Federation of Soil & Water Conservation Districts : Home

For the first time he had whites working for him primarily doing work vegetating school grounds, city parks, roadsides, and drainage ditches. It supports programs that aid students with learning disabilities; target at-risk populations and integrate all learners; provide equal access; offer quality programming using innovative methods; apply data-driven approaches; and educate the whole child. Established in 1964, the Volunteer Pool is a not-for-profit organization that matches volunteers to needs and requests from local schools and other agencies.

DEC Statewide Forest Ranger Highlights

Unlike most Blacks working for the Soil Conservation Service, Blankenship had been a work unit conservationist under the general direction of the area conservationist. Also, very little is known regarding risk of rodent-borne zoonoses in the study area and elsewhere in the Lao PDR.

Funding Opportunities

It makes a difference in the lives of thousands of families and individuals that need local opportunities for athletics, arts and culture, counseling, learning, building friendships, and community connections.

Forest conservation

In 2003, NOAA Fisheries began a research and conservation program with congressional funding to address the dwindling population. By the end of the 1960s, many soil preparation methods in corn were available to help reduce soil erosion, such as mulch tillage, double-cut plowing, manure mulching, ridge-row tillage, listing, and corn—sod intercropping.

How Conservation Helps People, Too

With the exception of the two top jobs in SCS--the Chief and the associate chief--blacks have served in most other job categories throughout the organization.

Ohio Federation of Soil & Water Conservation Districts : Home

The National Education Foundation, the national leader of STEM education, is looking to supply funding for school districts with a rate of 35 percent of students or higher who qualify for free or reduce-cost lunch.

Private Landowners: The Key to Conservation Success

Garbage patches of varying sizes are located in each gyre. Reducing erosion on fields after harvest through spring. It makes a difference in the lives of thousands of families and individuals that need local opportunities for athletics, arts and culture, counseling, learning, building friendships, and community connections.
