**Rhododendron (Azalea,  
Rhododendron, Rosebay)**

Some rhododendrons like more sun and some like more shade. Recommended insecticides that are available in homeowner size packaging include acephate, bifenthrin, lambda cyhalothrin, malathion, and cyfluthrin. Watering is a critical element in growing rhododendrons and azaleas.

## JARS v38n3

Its predominance alongside garden hedges in countries such as England traditionally would be the result of both of the colors and of the toxins, which were a way of warding off intruders. While very noticeable, these galls will not threaten the health of the plant.

## Growing Rhododendrons and Azaleas in Iowa

Becoming a contributing member of Gardenia is easy and can be done in just a few minutes.

## How to identify rhododendron and azalea problems (1984 edition)

Many smaller varieties have been developed specifically as rockery plants. This plant is frequently damaged by deer. Mulching: Mulch with , bark chips, or pine needles to prevent weeds, since hoeing can easily damage the surface roots.

## JARS v38n3

Frost Damage If buds are formed and then turn brown, cause is usually frost. Plant them as soon as possible and let them adjust.

## JARS v38n3

Avoid excessive irrigation in fall. Former arboretum Director Benjamin Y. It is best to prune within two weeks of when they stop blooming.

### **Azaleas and Rhododendrons: What is the Difference?**

Hence, blue hydrangeas shouldn't share the same beds with rhododendrons and azaleas. If the water has not drained out of the hole within one hour, the soil is poorly drained and you must correct the drainage problem before planting. Azalea Galls This unsightly fungal disease is characterised by green, pink or red swellings on the leaves and shoots.

### **Rhododendron Problems: What's Wrong With My Rhododendron?**

It harms rhododendrons and azaleas. Rhododendron is planted too deep? The first photo does look like chlorosis, which is a nutrient deficiency. Hi Andy...it could be a few things: 1.
