Geological localities

Because of the hierarchical structure of the information about each site, it is possible to search the database using different

scientific criteria, e. Thus, any considerable dynamic differentiation of sediments of the shore area is not observed. Navigation on the ground is enabled by a brief description that guides visitors to the site of interest.

Geologija

Za rozvitak geologije u nacionalnim okvirima zasluzan je 1813. From 2001 this database is used in the Geographical Information System GIS of the Czech Geological Survey and it is gradually completed and updated primarily of information acquired by geological mapping in the scale 1: 25000. Njegova brojka od 4,5 milijarde godina nije se previše mijenjala niti razvojem drugih metoda.

Štátny geologický ústav Dionýza Štúra

Поскольку остров испытывает медленное поднятие, то по всему его побережью хорошо развита зона бенча. Širi interes za geološke probleme izazvale su rasprave između tzv. Клифы здесь очень активные и служат источниками поступления обломочного материала в береговую зону.

Geological localities

Cretaceous transgression over Carboniferous - Lobeè Author: Pavla Gürtlerová Accessibility of data Database is accessible through the search application and map server of CGS.

Geologija

A list of these districts and the geologists responsible is given and more information about them. Ta smjena geoloških paradigmi i prihvaćanje koncepta smatra se jednim od najvećih napredaka u povijesti geologije. The site may also be identified as a potential stratotype or a geological

section of special value for educational purposes.

Štátny geologický ústav Dionýza Štúra

Secondly they are grouped with respect to location in the protected area. Profesionálne temelje nacionalnom geološkom školstvu u Hrvatskoj, ne samo u okviru visokoškolskog obrazovanja, nego i u istraživačkom pogledu, postavljaju i 1856.
