Redi managed to prove that flies did not spontaneously arise from rotting meat. They developed large eyes, the largest of any animal, to be able to detect small amounts of light in the dark and deep ocean where they live.

Invertebrate Zoology

Etymology: Named after the host dog in Sanskrit, svana. Potential sources of conflict of interest include, but are not limited to: patent or stock ownership, membership of a company board of directors, membership of an advisory board or committee for a company, and consultancy for or receipt of speaker's fees from a company.

Invertebrate Zoology

He proposed that the focus be on evolutionary relationships over similar morphological features. One of the major works to be published in the area of zoology was 's', which was published in numerous editions from 1551 to 1587.
