Case story: Danish Poultry

Pork The production of pork comprises recognized slaughtering at slaughterhouses and abattoirs, exports of live slaughtered animals including piglets and slaughtering at producers. That policy has reaped enormous benefits for consumers, Helwigh said, and saved millions of dollars in

medical expenses. Promising technologies exist for the agriculture sector, he said, but they need to be tested, scaled up, and improved.

Boosting meat industry performance

In case of a coli in the batch you will have to accept a 5 to 7% mortality. The system: Thomas Knudsen has been involved in the development of the KIK database right from the start. Animals under 300 kg live weight are regarded as calves.

New Danish poultry forum

For exports of live animals, the export value fob is applied as 15 pct.

Contaminated chicken: After illnesses soar, Denmark attacks salmonella at its source

Data on imports and exports of pigs and pork are compiled by means of extracts from Statistics Denmark's official external trade statistics, supplemented by information from duty funds in agriculture. From 2005 the number of slaughtered animals at the producers is fixed at 24,000 pigs annually corresponding to 1.
