Is hysterectomy necessary for the treatment of utero

Persian physician 980—1037 wrote The Canon of Medicine, a synthesis of Greek and Arab medicine that dominated European medicine until the mid-17th century. Universities such as , and were particularly renowned. Nejad is dedicated and committed to the complete care of the female patient at every age so that they are empowered by their physical well being.

Preventing ureteral injury at hysterectomy: Expert approach

However, cephalad displacement does not guarantee prevention of ureteral injury because it may not achieve sufficient displacement if the ureter is adjacent to the lateral cervical wall. Laparoscopic and robotic instruments are usually 5 and 8 mm in diameter, respectively, indicating that 1 of 8 patients is at risk of ureteral injury during endoscopic hysterectomy even when a proper technique is used. After one of his nurses suffered skin damage due to having to sterilize her hands with carbolic acid, Halsted had a rubber glove that could be dipped in carbolic acid designed.

KEYNOTE LECTURE :: 120 Years of Radical Hysterectomy: Origin, Evolution, and Influence on Benign Gynecologic Surgery
