For a process to send a message, it needs to package the inputs in the private data of the message class and then transmit it via the network transport which can be implemented in multiple different ways and is not material to this discussion.

An actor

Generalized approximate message passing GAMP and approximate message passing AMP are iterative compressive signal reconstruction algorithms that enjoy many mathematical and practical advantages. Your example is actually similar to what I am doing.

Published in: Synthetic Biology UK 2016 Le, Anh Tuan and Maple, Carsten 2019 In: Living in the Internet of Things IoT 2019 , London, 1-2 May 2019. Edited January 9, 2019 by drjdpowell It's not that I didn't like it.

Translating lucid data flow into message passing actors

Lucid's dataflow approach to programming has more in common with that of the UNIX TM shell, with its filters and pipelines, than with the imperative, one-step-at-a-time approach of ... This is a problem regardless of whether you use LabVIEW classes or any other data structure. Next method is recursive and it steps through all elements in the collection.

British Library EThOS: Translating Lucid data flow into message passing actors

. Associate Professor, at IIT from 1984-1999, Illinois Institute of Technology, Department of Computer Science. .
