## Regeneration process of the karst water springs in Transdanubian Mountains, Hungary

The geomorphic properties of karst water springs were mapped, using detailed field survey DGPS and geomorphic mapping. The main types are igneous and metamorphic rocks, indurated sediments sandstone, quartzites, shales, and such , and carbonate rocks, the latter group forming a special type of chemical and biological sediments.

## Actes de conférences : « Model purposes »

These ages are consistent with age constraints derived from Carboniferous conodont biostratigraphy from the same sections.

## Regeneration process of the karst water springs in Transdanubian Mountains, Hungary

Vous pouvez aussi télécharger le texte intégral de la publication scolaire au format pdf et consulter son résumé en ligne lorsque ces informations sont incluses dans les métadonnées.

## Uranium

« A fast steady-state loss model of a modular multilevel converter for optimization purposes ». Important components are the heat exchangers, fan, grille-, and engine blockage.
