spaceneb.us.to: Evolution and the Big Questions: Sex, Race, Religion, and Other Matters (9781405149037): Stamos, David N.: Books

The r and K strategists differ in the number of eggs they produce. But more importantly, the probability that five races of the same species in five very different geographic localities would evolve separately into the same species let alone at different times , with all of the resulting races perfectly reproductively compatible, is so vanishingly small that the theory is not worth the paper it is written on. Buss By Daniel Kruger By Robert Kurzban By Debra Lieberman and Martie Haselton By Edouard Machery By Gary Marcus By Daniel J.

Microaggressions: The Small Big Things About Gender, Sex And Sexuality

The study of the human mind must be grounded in biology, the study of life.

Andrew Sullivan on why we shouldn't ban the teaching of CRT, but why it's bad to teach it

Passages in the Bible state that the natural order created by God implies a divine moral order e. Race Differences in Brain Size Chart 7 shows that there are race differences in brain size. Around the world, Blacks have the highest crime rate, Orientals the least, Whites fall in between.

Bringing Darwin into the social sciences and the humanities: cultural evolution and its philosophical implications

Human Nature, 19 2 , 119—137. Growing up in a good home helped all the children. Therefore, do not waste time in long and exhausting explanations.

Andrew Sullivan on why we shouldn't ban the teaching of CRT, but why it's bad to teach it

Humans are the most K species of all. Moreover, cultural separation has often served to keep human populations apart when geographic separation has not. This is true for every single species on the planet with one exception: Homo sapiens.

Bringing Darwin into the social sciences and the humanities: cultural evolution and its philosophical implications

Over fifty percent of these are female. In *Race, Evolution, and Behavior*, Rushton often cites an earlier work by Herrnstein, agreeing with its data and conclusions. This, however, is where the real debate begins.

Evolutionary theory and psychology

Four misunderstandings about cultural attraction. It offers a lively, informative, and timely look at a wide variety of key issues facing all of us today—including questions of race, sex, gender, the nature of language, religion, ethics, knowledge, consciousness and ultimately, the meaning of life. The 1993-1996 INTERPOL Yearbooks show the violent crime rate per 100,000 population was 35 for Asians, 42 for Europeans, and 149 for Africans.
