withdrawal-induced aggression in rats. Twin studies compare the risk of alcoholism in pairs of twins reared in the same environment, examining both identical twins i.

## Alcohol, drugs and substance abuse

Pharmacology Biochemistry and Behavior 28:437-442.

## Comorbidity of mental disorders with alcohol and other drug abuse. Results from the Epidemiologic Catchment Area (ECA) Study

Clinicians should take a full history of any patient suspected of having a problem with drugs, asking, for example, about which drugs are used, age of first use, pattern of use, consequences of use, attempts to quit, and treatment history. It is important that clinicians evaluate all patients for substance use disorders. Prevalence of alcohol and drug use disorders by age in the United States Source: 2001—2002 NESARC THE GENETICS OF ALCOHOL AND OTHER DRUG USE DISORDERS—SHARED RISK FACTORS? While UNISON has sought to ensure that the information is accurate and up to date, it is not responsible and will not be held liable for any inaccuracies and their consequences, including any loss arising from relying on this information.
