## Emerging Lessons From Regional and State Innovation in Value

Project leadership: The Maine Health Management Coalition Foundation MHMC-F, a nonprofit organization composed of public and private employers, unions, hospitals, health plans, and providers. The New Hampshire project encountered these issues in its ACO development.

## Lessons from Regional Elections

Doing so could have reduced opportunities for corruption and may have contributed to creating more confidence in the future, something that is often lacking in a post-conflict environment.

## Lessons learned from national government

The authors acknowledge the contributions of the project's advisory group, whose members reviewed the annual site reports and executive summaries and provided insights into emerging themes.

## Emerging Lessons From Regional and State Innovation in Value

Environmental stress has contributed to recurring disasters.

## Emerging Lessons From Regional and State Innovation in Value

How sustainability was ensured Grounding the approach in the ten-year National Health Strategy ensured sustained human and financial resources through three governments of left- and right-leaning political parties. Ultimately, 8 medical groups with 12 clinics met the criteria and agreed to participate, along with 7 health plans.

## Abstention, RN flop ... Lessons from regional

All the medical groups are reforming their systems to reduce avoidable ED visits, but only one is also aiming to reduce avoidable hospitalizations. However, the programme strategically decided not to provide education on sexuality to avoid risk of opposition to the broader agenda.

### **Lessons learned from national government**

Reconstruction spending increased by 58 percent from FY 2009 to 2010, despite widespread reports and analysis that suggested spending at the previous, lower levels was already problematic in terms of accountability and budget execution. Data related: the prior vendor's inability to provide sufficient reporting and analytic support; lack of electronic health records in many small practices preventing efficiently inputting data into the database; reluctance by some provider organizations to share their data with employers. Determined partly by its decentralized market, the project's objective is to improve the quality and efficiency of health care in the region through programs that pay a virtual provider team a bonus when a minimal percentage of patients achieves all the clinical targets for a specific chronic condition.

### **ACFTA Success and the Lessons from Regional Economic blocs**

The communication campaign launched in disaster by the government to encourage young people to vote did not seem to cause remobilization in the second round. Similarly, on the demand side, health plan cost sharing could be designed to encourage the selection of higher-value provider organizations.
