The Role of Neurotransmitters

Hintikka J, Tolmunen T et al.

Amino Acids: Old Remedy, New Promise

Tyrosine was reported to significantly decrease adverse symptoms, including mood and performance impairment.

Neuropeptide

Acetylcholine does not fit into a group. Women were recruited because prior evidence had shown that tryptophan depletion reduces brain serotonin levels disproportionately more in females than in males this is but one of many known examples of differences in brain chemistry between men and women.

Dietary amino acids and brain function

Neuronal NOS is also expressed within smooth muscle cells of the penile corpus cavernosum and thus, NO produced by this enzyme is involved in penile erection. Catabolism of the catecholamine neurotransmitters. The CKM gene is located on chromosome 19q13.
