Studies in the History and Method of Science, Charles Singer

E in then, i in sit, o in nor, and u in put have not the same sound -is a in fate, in machine, o in hole, and u in rude. Unless above himself he can Erect himself, how mean a thing is man! As in life, so in sacrament, the first Christians offered themselves in the spirit of Christ; therefore, in his name. There is one property of a continuous expanse that I must mention, though I cannot venture to trouble you with the demonstration of it.

Structure settlements

This rock is a mass of granite-porphry, and there is also whinstone mixed in that mass: this I have only from information and from specimens, having never been upon that singular island.

The World's Greatest Books, Volume XIII.

The Regimen Sanitatis of Salerno, written about 1101, was rapidly diffused throughout Europe, and must have reached the Rhineland at least a generation before the Liber Divinorum Operum was composed. The botanist who discovers a new plant feels, and justly too, that he has made a valuable addition to scientific knowledge, but it may be doubted whether there is a botanist in Missouri who within the past year, or in the past ten years even, has discovered three hitherto unknown species of plants. They set up theories which have 39no other evidence than compatibility with the few facts that happen to be known; and forget that many other theories of equal claims might readily be invented.

Revising the Revisions: James Hutton's Reputation among Geologists in the Late Eighteenth and Nineteenth Centuries

THE DAYS OF CREATION AND THE FALL OF MAN IX. At the Reformation it might have seemed at first as if the study of theology were about to return.

The World's Greatest Books, Volume XIII.

To know this condition is equivalent to knowing the meaning of the statement. For the immense progress which modern mathematics has made is also to be explained by the same intense interest in testing general propositions by particular cases — only the tests were applied by means of particular demonstrations. They are names that were conjured with by the generation of American scholars before the present.

Revising the Revisions: James Hutton's Reputation among Geologists in the Late Eighteenth and Nineteenth Centuries

Then Esdras said: I know the most High is called merciful, and he pardoneth; for if he did not so that they which have committed iniquities might be eased of them, the ten thousandth part of men should not remain living; there should be very few left, peradventure, in an innumerable multitude. True Science is cautious and conservative; no defect can long escape its probe and scalpel. It is supposed by many to be the very opposite of theoretical.
