Scopes Trial

That said, the meaning you find in the above 30 principles of justice depends on your own sense of history and life experiences. Moreover, they take the view that the Pleistocene social groups in which they believe these sharing behaviours evolved were probably too large for reciprocal altruism to explain their emergence.

A Brief Explanation of Evolution

The point is that in the U.

Timeline of the evolutionary history of life

Sometimes such observations are direct, like measuring the chemical composition of a rock. The structures and contents of our dwellings and workplaces, the constitutions of the domesticated plants and animals we interact with, the cultivated and engineered environments we live in, all have been affected by the activities of our predecessors. To say that someone has conformist bias is to say that the person in question has a tendency to imitate those behaviours, beliefs or other dispositions that are present among a high frequency of individuals in the population.

Evolutionary biology

In the phylogeny on the left below, 1 each branch's length corresponds to the number of amino acid changes that evolved in a along that branch. Cultural evolutionists frequently draw attention to a variety of adaptive cultural traits, whose origination seems inexplicable in terms of individual innovation alone. John Scopes What became known as the Scopes Monkey Trial began as a publicity stunt for the town of Dayton, Tennessee.

The Meaning of Evolution: A Study of the History of Life and of Its Significance for Man, Revised Edition by George Gaylord Simpson

Plato believed that each class would fulfill a necessary function and contribute to the common good. A system in which offspring resemble parents

with respect to fitness-enhancing traits may not develop complex adaptations.

Social Justice: History, Purpose and Meaning

The phylogeny on the right shows the same relationships, but branch length is not meaningful in this phylogeny. Blue eyes came about just 10,000 years ago when a gene mutation turned off the switch to produce brown eyes. A society characterized by a narrow gap pays descent wages to ordinary people and rewards the working and middle class.
