Defining an Individualized, Strengths

Issues in international family studies include regional limitations and the various aspects of doing research cross-culturally. Descriptive data concerning the linkages between work-family pressure and several known correlates work hours, number of children, job satisfaction, mental well-being, and physical well-being will be presented. As this research is currently in the planning stage, this article will focus on explaining the underlying theoretical framework and rationale, as well as the proposed research methodology.

URL Other contributors Series Notes Includes bibliographical references and indexes. Traditional practices, focusing on what was wrong with the child or the family, resulted in a child welfare system that was punitive and stigmatizing in its approach and often produced passive and resistant responses from clients Waldfogel, 2000.

International Comparative Study of Work

Some studies, for example, focus on how husbands and wives communicate and the degree to which they communicate successfully Tannen, 2001.

Families and Family Study in International Perspective on JSTOR

Abstract As businesses continue to globalize, organizational research from an international perspective has become increasingly important. Researchers, educators, practitioners, and policymakers from all family fields and disciplines share knowledge and information about families. Each issue averages 284 pages in length.
