Welcome to Ministry of Health and Family Welfare

National Technical Working Committee on Newborn Health, Bangladesh National Guideline: Management of infection of the 0-59 days infants at union level facilities and NGO clinics without indoor facilities. The stakeholders then developed solutions to address the challenges identified in the previous cycle and implemented these changes in the subsequent cycle Fig. MaMoni HSS also attended the monthly meetings for the SACMOs at the UHC in Ramgonj to support preparation of monthly reports.

Implementation research to support Bangladesh Ministry of Health and Family Welfare to implement its national guidelines for management of infections in young infants in two rural districts

CHWS are local women with at least tenth grade education, who receive 6 weeks of basic health training, and each CHW serve a population of about 4000 persons.

Impact on the performance of family welfare assistants for their involvement in Expanded Program on Immunization

Global, regional, and national causes of child mortality in 2000-13, with projections to inform post-2015 priorities: an updated systematic analysis.

Implementation research to support Bangladesh Ministry of Health and Family Welfare to implement its national guidelines for management of infections in young infants in two rural districts

Through these workshops, participants shared early learnings from implementation support and evaluation activities and worked together to develop solutions to better support the implementation of the new guidelines.

As a result, it will be difficult to tease out the improvements in maternal knowledge or care-seeking that may be linked to the community mobilization activities. A total of two stakeholder workshops were held in Dhaka after the first and third round of data collection, in January and September 2016, respectively.
