IIE Releases Survey on Effects of COVID

. Approximately five million college graduates, the largest number in history, will enter the job market this year, in addition to surplus rural labourers swarming into cities for work. And over 82 percent say they use, or plan to use, the Chinese language in their work.

For American Students in China, Some Risks, No Regrets

For marketing purposes, we make life abroad a big part of our social campaigns.

Education in China

It is known that thousands of Chinese students go to America to get a higher education and the number of them is still increasing every year.

• China: number of students that study abroad 2018

Accordingly, grew to more than 51 percent of the respective age cohorts in 2019.

Ambassador Calls on Chinese Students in UK to 'Serve the Motherland'

WACO, Texas: Chinese students on US campuses have been caught in the middle of the deteriorating relationship between the United States and China.

Education in China

Most of those who responded to our survey were the first in their family to study abroad. The acculturation process demands that they interpret new experiences through their own subjective and preexisting knowledge and perceptions.

Language, academic, socio-cultural and financial adjustments of mainland Chinese students studying in Hong Kong

Your family and friends will still be there when you get back, in fact, you can connect with them through technology. Senior high school students also need to choose between a social science or natural science orientation. In these schools, Chinese students are taught by local Chinese teachers in subjects like maths, Chinese language and values education.

Survey finds prospective students put the emphasis on welcome and teaching quality

The imperial education and examination system in China is estimated to have been founded as early as the Han dynasty 206 BCE to 220 CE , and is strongly based on meritocratic ideals that persist in Chinese education to this day.
