## SparkNotes: Charles Darwin: The Origin of Species

In the end, Hooker and Lyell decided that Wallace's paper should be presented before the Linnean Society, but Darwin should also contribute a sketch of his own theory.

## SparkNotes: Charles Darwin: The Origin of Species

At the zoo he had his first sight of an ape, and was profoundly impressed by how human the seemed.

## The Origin of Species by Means of Natural Selection

With animals this kind of selection is, in fact, likewise followed; for hardly any one is so careless as to breed from his worst animals. New England Journal of Medicine. The three primary adaptive capacities could logically have been: 1 the capacity to replicate with moderate fidelity giving rise to both heritability and variation of type , 2 the capacity to avoid decay, and 3 the capacity to acquire and process resources.

## Natural selection

The Different Forms of Flowers on Plants of the Same Species, Part 5 p. At the commencement of my observations it seemed to me probable that a careful study of domesticated animals and of cultivated plants would offer the best chance of making out this obscure problem.
