Language acquisition is a product of active, repetitive, and complex learning.

Children's Quiz

This is probably the most important point.

Language development: Speech milestones for babies

Leave a diagnosis to a speech-language pathologist, who is specially educated for identifying communication disorders.

Age

Our speech-language pathologists provide intensive therapy to help your child and family prepare to work with community or school-based speech-language pathologists. The combination of these capabilities allows the creation of language. Or you can try clapping words to identify syllables.

Spanish Children's Stories

Below are some do's and don'ts for talking respectfully and productively about a potential communication delay. Schools can do their own testing for language or speech disorders to see if a child needs intervention. Pragmatic rules are part of our communicative competence, our ability to speak appropriately in different situations, for example, in a conversational way at home and in a more formal way at a job interview.

Spanish Children's Stories

It is a misconception that children learn language passively. This awareness paves the way for later reading tasks. Cognition involves operation of the mind, or thinking.
