During his legal studies he applied himself with intelligence, vigor and energy, and thoroughly familiarized himself with the theory and practice of law, as his subsequent progress well testifies. There is no doubt that this book is one of the most useful of its kind published, and will be a very popular compendium. The rod goes either through the beam, and is then fastened by a nut resting on a metal plate, or washer, or a stirrup, or strap is put over the beam, a hook on the upper side of which goes into the eye of the shackle of the suspension rope, or into the loop formed on it.

When the entire pressure of the shafting is downwards the upper brass bush is omitted, and the cap is cast hollow and kept full of grease, so as to secure the most perfect lubrication of the journal of the shaft. In this case the nominal friction increases slightly; but the advantages in lubricating more than counterbalance this trifling loss of power.

At this day more than a score of dialects are spoken in Italy, and the majority of the population of that Peninsula can neither speak nor understand Italian. The doctor has a rare literary talent which, coupled with a thorough knowledge of his profession, has given him a chance to distinguish himself.

#### **Beaver Biographies**

If two bodies come in contact with each other, so that one strives to penetrate or occupy the space occupied by the other, a reciprocal action takes place, which produces a change in the condition of the bodies so coming in contact.
