X or the Y axis, then the squareness accuracy comes into play. Where mass comparators are in use in applications different than weight calibration, it is crucial to apply existing quality standards on the XPR-C balances, identical to other analytical or precision balances.

Types of Optical Comparators Digital optical comparator Digital optical comparators are fast, accurate, and easy to use. Each machine is rebuilt and refurbished by hand in our Beaver Creek, Ohio facility. Services CALIBRATION Verify, Calibrate and adjust the geometry and accuracy in all three axes.

Hand Gauge, Calipers & Optical Comparators Calibration

We understand the importance of getting mission critical equipment back in to your work flow as quickly as possible. Our computerized digital electronics capabilities allow automatic economical, fast and error-free calculations and surface plates will be checked for flatness and repeat reading. In an effort to help save you time and money we perform many calibrations on-site.

Comparator Calibration Services

Finally, optical comparators come with major cost savings, ergonomic designs, reduced inspection time, and reduced costs of training.

These incredible tools create a magnified image a part, leading to simple and accurate measurements. Whenever the measuring stage is moved along either the

The VisionGauge® Digital Optical Comparator can also be integrated into an automated work cell and controlled via Ethernet or RS-232 communications. Their knowledge and years of experience is worth the higher hourly rate which in the end would have saved us a lot of money.

Optical Comparator Calibration

Periodically evaluating the state of your machine level, backlash, and repeatability will assure continued peak performance and the machines' capabilities of producing parts that meet rigid specified tolerances. Master tools can be measured either in our laboratory or on-site. The systems include industry standard dovetail mounting grooves for easy part fixturing.

ENI Labs

Our techs will arrive at your facility with all the tools and equipment they need to perform a fast, efficient calibration.
