Bee

A solitary bee, family , visiting Most solitary bees nest in the ground in a variety of soil textures and conditions while others create nests in hollow or twigs, holes in.

Mason bee

Bees collect pollen to feed their young, and have the necessary adaptations to do this. By the ~45 mya there was already considerable diversity among eusocial bee lineages.

Bee

Some solitary bees have advanced types of pollen-carrying structures on their bodies.

Bee

This division of labour creates specialized groups within eusocial societies which are called.
