Cardiovascular Disease Burden From Ambient Air Pollution in Europe

I visit schools, towns and villages in the Ostrava region of Czechia. This covered about 50% of the costs. In this process, an organism accumulates the entire amount of a toxic compound that it consumes over its lifetime.

Cardiovascular disease burden from ambient air pollution in Europe reassessed using novel hazard ratio functions

Some species of trees appear to be the most susceptible. Here we test the assumption that the derived MRRs are representative for the populations of other countries China and consider the global impact.

Cardiovascular Disease Burden From Ambient Air Pollution in Europe

Some crop plants show ozone damage Figure. Plants that are exposed to acids become weak and are more likely to be damaged by bad weather, insect pests, or disease. The higher population exposure to PM 2.

Air pollution drops in Europe, but how long will it last?

Methods and results We characterized global exposure to fine particulates based on satellite data, and calculated the anthropogenic fraction with an atmospheric chemistry model.

Italy Air Quality Index (AQI) and Air Pollution information

Chemical pollution is linked to a rise in severe health and environmental problems throughout Europe that are adding billions of Euros to public healthcare bills.
