McCord and Ensminger 1997 found, however, that, on average, girls were exposed to fewer risk factors e.

### Social Control Theory and Delinquency on JSTOR

Delinquency in girls, as well as boys, is often preceded by some form of childhood victimization Maxfield and Widom, 1996; Smith and Thornberry, 1995; Widom, 1989. Historically, one aspect of family structure that has received a great deal of attention as a risk factor for delinquency is growing up in a family that has experienced separation or divorce. Any risk of violating individual liberties would be considered secondary over the need to protect and ensure the safety of the community in this model.
