Specific areas of focus connected to Technoethics form the following branches: Computer and Engineering Ethics, Educational Technoethics, Information and Communication Technoethics, Technoethics and Society, Technoethics and Cognition, and Biotech Ethics. This changing relationship between employee and employer because of the integration of GPS technology into popular society is demonstrating a larger ethical discussion on what are appropriate privacy levels. Global Media Convergence and Cultural Transformations: Emerging Social Patterns and Characters.

Technoethics

The Geneva conventions also prohibit unprovoked attacks and say that counterattacks must be proportionate to the attack and of a similar type. As an added resource, several invited experts in Technoethics from around the globe were interviewed to provide insider information on key challenges and opportunities in a variety of areas where new technologies are debated. This brings up a series of social and ethical questions regarding new technological advancements and new boundary crossing opportunities.
