After they finish all their chores, of course.

### The Magic Faraway Tree (The Faraway Tree, #2) by Enid Blyton

The Faraway Tree Series were some of my other favourites, and moving from New Zealand to London felt a bit like how the children and other folk must have felt popping up the ladder at the top of the Faraway Tree to a land that was somewhat familiar, but at the same time full of strange and interesting people and places... The Enchanted Wood Dust Jacket. I didn't enjoy the obviousness of how it all turned out.

It made me smile to realise that it wasn't such a big book after all.

The book has been awarded with , and many others. Joe climbed the ladder, and suddenly, his head poked out into the Land of Topsy-Turvy  
NAOMI WILKINSON: Then one-by-one, all of the others followed and soon, all seven of them, stood in the curious land. A different one each time you visit.

### The Magic Faraway Tree (novel)

The other difference that strikes me is that at the end of the first two books it is the children and their friends themselves and in the case of the second, their ill Mother who are in peril, and in the third book it is the Faraway Tree itself which is in great danger. Where would you go, and what would you do near your own home? The characters get stuck in this land because the Sandman throws sand in the children's eyes to make them sleep. Who wouldn't want to stay there forever?! NAOMI WILKINSON: As they climb higher and higher, Rick can't wait to see it.
