### Archive

The notion of permanence has fewer adherents daily, though we have yet to take seriously enough the limitations of potential future resources. The archivist constructs an inventory of the records themselves and then describes the history of the person or body that created the records. Profiles in Science includes digitized letters, draft manuscripts, photographs, diaries, and more that provide insight into the challenges and successes of scientific discovery and the diversity of paths and perspectives involved.

### Levels of Archival Arrangement—A Primer

Van Duyn, 1929-2007 Canadian Museum of Civilization Archives Collection Harvard University Terry, James, 1844-1912 American Museum of Natural History Terry, Robert J.

### Archives and Modern Manuscripts Collections

Abstract This small collection of documents and correspondence pertains to Africans and their descendents in the Americas in the 18th and 19th centuries. The law of averages as it pertains to the survival of records assures the retention of vast classes of materials without further attention by archives.

It's also nice to have info about project management and funding.

### **Archival Studies**

If no internal order is perceptible, the archivist's concern for protecting established relationships does not come into play.
