Shakunetsu Hadoken

This creature, called a kutabe in this legend, warned of a deadly plague that would soon sweep through the lands.

Hakutaku

It is not until Alpha 2 Gold where both versions revert to the classical half-circle forward motion and are thus able to perform it from any range. Origin: The hakutaku, like many other holy beasts, comes from Chinese legends. It also does more shield damage, knocks the target back further and hits multiple times five in total, the first four do 1% damage plus the last hit 4%.

Hakutaku

In and up to , and to , his version of the move does not appear directly, instead functioning as his two-hit EX Hadoken. He charges slightly and glows red prior to releasing the projectile.

In Street Fighter V, the EX version also deals steady damage in the form of grey health to enemies near him during the move's startup similar to 's V-Trigger , though should the Hadoken land, it still does the normal damage, removing the grey health with it. The projectile hits 1-3 times, depending on the strength of the punch button; this also impacts recovery, with light punch recovering the fastest, and heavy punch hitting the most.
