But it may be said without any doubt that no building raised in Europe after 1500 is so pure a specimen of Gothic as this; and, with all its faults, and especially its strong tendency to mere bigness, it stands first in beauty among those of our churches which are not cathedrals—that is, after Westminster Abbey. Chemically, the chlorites are distinguished from the micas by the presence of a considerable amount of water about 13% and by not containing alkalis; from the soft, scaly, mineral talc they differ in containing aluminium about 20% as an essential constituent. It was known or feared that the slave catchers were after them and the church people were a little nervous.

An Extract of Reflection: August 2011

It was laid before the remnant of a parliament then sitting in London, and was deemed of such consequence that no less distinguished a writer than

the illustrious Milton was employed to prepare a reply. Finally two boards of trustees were acting and the case was appealed to presbytery.
