

# State of the art, compaction of asphalt pavements.

## - - FIELD AND LABORATORY INVESTIGATION OF STRIPPING IN ASPHALT PAVEMENTS: STATE OF THE ART REPORT

Description: -

- Pavements -- Design and construction.

Pavements, Asphalt.State of the art, compaction of asphalt pavements.

- Special report -- 131.State of the art, compaction of asphalt pavements.

Notes: Includes bibliographical references.

### MTC

Thermocouples are normally installed just outside the effective testing area. The objective of the proposed study is to extend the current RTS technologies to applications on asphalt paving, asphalt RTS or ARTS.

## FIELD AND LABORATORY INVESTIGATION OF STRIPPING IN ASPHALT PAVEMENTS: STATE OF THE ART REPORT

Example of a transverse surface profile after 100,000 load passes. Overview Laboratory Purpose The Pavement Testing Facility PTF uses rapid pavement testing of full-scale structures to evaluate the durability of both new and existing pavement materials.

### Pavement Testing Facility Overview

The PMSG seeks collaboration with other groups, institutions, companies and agencies.

### Pavement Materials and Systems Group

The effective loading area includes tire wander if used in the experiment and excludes the transitioning zone used to lower and raise the tire. The base layer was completed with the placement and compaction of new crushed aggregate material on the last 6 inches. Rutting is measured through the laser surface profiler total rutting only and also through the rod and lever survey.

### Pavement Testing Facility Overview

Conference topics cover a broad array of contemporary issues for professionals involved in bridge, pavement, geotechnical, tunnel, railway, and emerging techniques for safety inspections.

### Asphalt Real Time Smoothness (ARTS) for Asphalt Paving Project

The paved area is 48 by 50 m 156 by 165 ft.
