### Complex

There'd been a lot of rain this week, the aftermath of a hurricane that had swept into Houston. This may sound familiar to fans of Stranger Things, where a similar device is used by the character Eleven, played by Millie Bobby Brown, to open a portal to the parallel, alternate dimension called the Upside Down. The various versions of the story say that the military successfully developed a technique that rendered the USS Eldridge, stationed at a naval shipyard in Philadelphia, not just invisible to radar but completely invisible to the naked eye.

### Strangers, episode 2, ITV review

Hollywood got its hands on this story before Stranger Things. This is my worst flaw as a cop; I'm well aware of it, and usually I try to guard against it. They finally agreed to place me with my family at 3 months of age.
