A long rod divided into 6-inch spaces, numbered from 1 to 16, was also provided for indicating the depth from the datum line of anything found. Summer Solstice Betelgeuse rising N.

Stonehenge and the Cursus

I have already pointed out that any temple, dolmen or cromlech oriented to a sunrise or sunset at any dates between the solstices will receive the sunlight twice a year. From the foregoing it will be now be clear that Stonehenge served several complimentary purposes.
