### The Skye flood of 1877, Weather

Red River Landing went above flood stage of 48.

### Memorable Floods at Harpers Ferry

This low potential for runoff along with relatively flat to gently rolling terrain throughout its basin results in generally localized flooding that is mostly confined to areas immediately affected by excessive rains. June 15, 1981 On the afternoon of June 14, 1981, a series of intense thunderstorms along the forward edge of a stalled cold front produced 5 to 20 inches of precipitation in about 12 hours near Great Bend Clement and Johnson, 1982. The Bonnet Carre Spillway was opened on May 9th to alleviate high flow rates past New Orleans.

### The Great Floods of 1877.

It heavily damaged to leveled 40 houses. High- Water Mark at Wichita Water Center A high-water marker at Wichita Water Center showing the water line that was surveyed by the USGS.

### Great Flood of 1875

The second largest flood on the river occurred July 8, 1904, and its level was about one-half foot lower than the 1877 flood. They succeeded in getting about 20 rods from Barney's residence when it appeared to them that their course was leading them into the storm. Maximum flows were estimated at 97,000 cubic feet per second near Coolidge and 87,000 cubic feet per second at Syracuse table 1 Kansas Water Resources Board, 1962.

### Local Weather History: The Forgotten Flood of Summer 1878

Plan after plan was suggested but none adopted. You can also see the River Trent and the old Trent Bridge, just to the right of the tree trunk. The USGS has operated a streamgauge on the Arkansas River at Wichita since 1934.
