Education was generally significant and region was not.

HAZU • Abstracts

Another aspect of the complex relationship between abortion and contraception concerns the number of abortions required to replace one live birth. Conversely, most abortions by saline 92. A sample of 76 teens, who made initial appointments at a family planning clinic for oral contraceptives, were interviewed at both their initial clinic visit and again three months later.

Full text of Sinai Journal of

The prevalence of oral contraceptive use and cigarette smoking is analyzed.
