## Biochemistry of tellurium

Cao MH, Liu TF, Gao S, Sun GB, Wu XL, Hu CW, Wang ZL 2005 Single-crystal dendritic micro-pines of magnetic  $\alpha$ -Fe<sub>2</sub>O<sub>3</sub>: large-scale synthesis, formation mechanism, and properties. In conclusion, Te columns provide an alternative method for efficiently isolating <sup>211</sup>At from irradiated Bi targets.

## PEDOT:PSS film: a novel flexible organic electrode for facile electrodeposition of dendritic tellurium nanostructures

The major industrial use of tellurium is in metallurgy, where it is an important alloying agent.

## Redox

Chemical transformations in ultrathin chalcogenide nanowires. Kilpatrick, The absorption, distribution and excretion of tellurium dioxide.

## Baking and Chemistry

Selenium Selenium appears as a red or black amorphous solid, or a red or grey crystalline structure; the latter is the most stable.

## Group 16: General Properties and Reactions

Selenium as an integral part of factor 3 against dietary necrotic liver degeneration. REFERENCES ABONDANZA TS, OLIVEIRA CR, BARBOSA CMV, PEREIRA FEG, CUNHA RLOR, CAIRES ACF, COMASSETO JV, QUEIROZ MLS, VALADARES MC AND BINCOLETTO C.

## Redox

The first description of this effect was reported for inorganic telluranes Albeck et al. Considerable work has been focused on the pathogenic E.
