Key to parasitic nematodes. (1961 edition)

Then, 100 nematodes in each group were collected for qPCR analysis as described above. BLASTP searches revealed that the Rs-CRT aa sequence showed high similarity to CRT sequences from five other nematode species.

Interactive Diagnostic Key to Nematodes

Based on the aa sequences of 22 CRT proteins from 20 species, a neighbour-joining phylogenetic tree was constructed using MEGA5. Clearly some form of pest control is sensible to investigate.
