

# NIH/ADAMHA/CDC technology transfer

## The Centers - Technology Transfer Collaborations

Description: -

-

Draft.

Armed Forces -- Mobilization.

Electronic industries -- United States.

Semiconductors.

Poultry -- Standards -- United States.

Meat industry and trade -- United States.

United States -- Economic policy.

Land use -- United States.

Plant-soil relationships.

Soils -- Nitrogen content.

Lightweight concrete.

Hardwoods -- United States.

Gypsy moth -- United States.

Solar energy.

Solar collectors.

Electronic instruments -- Maintenance and repair.

Apprentices -- United States.

U.S. Army Signal School -- Curricula.

Clinch River Breeder Reactor Demonstration Power Plant (Tenn.)

Federal aid to regional planning -- United States.

Appalachian Regional Commission.

Air bag restraint systems.

Automobiles -- Seat belts.

United States. -- National Highway Traffic Safety Administration.

Motor fuels -- Economic aspects.

Automobiles -- Fuel consumption -- Economic aspects.

Pension trusts -- United States.

Pensions -- United States.

Radio frequency allocation.

Expansion (Heat) -- Measurement -- Automation.

Expansion (Heat) -- Measurement -- Data processing.

Sulphur.

Sodium.

Storage batteries.

Energy consumption -- Minnesota -- Detroit Lakes.

Power resources -- Minnesota -- Detroit Lakes.

Energy policy -- Minnesota -- Detroit Lakes.

Radiation -- Physiological effect.

Nuclear weapons -- Testing -- Physiological effect.

Valves -- Testing.

Agriculture, Cooperative -- United States.

Nuclear fusion.

Isotopes.

Germany (West) -- Politics and government.

Press and politics -- Germany (West) -- History.

Frankfurter Allgemeine.

Adenauer, Konrad, 1876-1967.

Electrodes -- Testing.

Magnetohydrodynamic generators.

Bills, Legislative -- United States.

Belarus -- Politics and government.

Soviet Union -- Politics and government -- 1985-1991.

Law and socialism.

Law -- Belarus.

.

### About Us

The NIH technology transfer function moves medical innovation from the benchtop through additional research and development, testing, regulatory approval, manufacturing, and finally to distribution as a medical product which will improve the health of everyone. Technology transfer at the NIH is a process which transfers medical knowledge from NIH laboratories to other organizations for the purpose of developing that knowledge into medical products to enhance the public health.

### About Us

Experience of visiting and meeting customers world over extensively, particularly to, USA, EUROPE, JAPAN, SINGAPORE, MALAYSIA etc. The NIH is a leader in medical breakthroughs, with the discovery of new biological molecules, processes and pathways, novel

Law -- Soviet Union.
