This language has a syllable structure with properties which are highly unusual. The Western Sahara, whose vernacular Arabic is of Mauritanian type, was off- limits during the time of fieldwork and is not covered.

**Dirāsāt mu'jamīyah : naḥwa qāmūs 'Arabī tārikhī wa**

Nuclear status is preferentially assigned to segments which are more sonorous than their neighbours. Any consonant may act as a syllable nucleus.

118843590

On the other hand, syllable structure is very simple.

This is a comprehensive study of the Jewish and Muslim dialect networks of Morocco in its traditional boundaries. The way these two conflicting demands are reconciled is by allowing vowelless syllables.

118843590

In the last two chapters we argue that our conclusions about Tashlhiyt Berber carry over to a certain extent to Moroccan Arabic. On the one hand, complex consonant sequences are a common occurrence in the surface representations. Unlike Tashlhiyt, Moroccan Arabic has an epenthetic vowel, but it also allows vowelless syllables.
