## Autism Spectrum Disorder / ASD Transition Toolkit Unit 3.4

Sensory Activities Because children with autism are sensitive to sensory input, can help ground them in the present. Treatment for autism spectrum disorder is defined to include psychiatric, psychological, habilitative or rehabilitative care, applied behavior analysis, therapeutic care and pharmacy care.

### Resource Materials

Try not to assume which symptoms a child has or try to self-diagnose a student with autism. Consequently, if language functioning is commensurate or consistent with cognitive skills, no further gains can be made through intervention. A plan may not limit the number of visits an individual may have with an autism services provider.

## Autism Spectrum Disorder / ASD Transition Toolkit Unit 3.4

In fact, there is no evidence to show that bilingualism has a negative impact on language development in children with ASD. However, regardless of these differences, the core characteristics and challenges associated with ASD will have an impact on the development of critical social communication skills. Informational Brochures Looking for autism related services and supports throughout the United States? Assistive Technology People who have an autism spectrum disorder may use assistive technology AT.

## Autism Spectrum Disorder / ASD Transition Toolkit Unit 3.4

This is not the case for boys e.

### Autism and Insurance Coverage
