Innuitions

Treatments of the dicotyledon families were released as they were produced. National Research Council of Canada, Division of Building Research, 1972. A second garden introduction, a delphinium-like plant with deep blue flowers *Aconitum delphifolium*, came from parent plants about 50 cm high in the Yukon.

Emerald Isle (Northwest Territories)

Nigel Tisdall travel writer and photographer about me consultancy. Stems often have woody development below soil level. The limited distribution records of the fireweed on Baffin Island suggests accidental introduction, possibly in packing material brought in from England, and distribution of seeds by hunters and trappers into the interior.
