**Unique Diagnostic and Therapeutic Roles of Porphyrins and Phthalocyanines in Photodynamic Therapy, Imaging and Theranostics**

In order to enhance the antimicrobial therapeutic efficacy of PACT, cytotoxic damage to neutrophils must be minimised. Localization of fluorescent Photofrin-II and aluminum phthalocyanine tetrasulfonate in transplanted human-malignant tumor LOX and normal-tissues of nude-mice using highly light-sensitive video intensification microscopy. The emission from NCs in the near-IR also gives them great potential as in vivo imaging agents.

**Thomas Macdonald from Waukesha, WI, age ~45**

The absorption band of PCs is almost two orders of magnitude stronger than the highest Q band of haematoporphyrin figure. Wolfe LA, Mullin RJ, Laethem R, Blumenkopf TA, Cory M, Miller JF, Keith BR, Humphreys J, Smith GK.

### **Induction and Modulation of Gastrointestinal Inflammation**

It is desirable in imaging and therapeutic studies to control and limit the cellular uptake and intracellular localisation of the NS used.
