## Measurement of Race and Ethnicity in a Changing, Multicultural America

The subcommittee examined state Medicaid and CHIP application forms and found improved standardization, most notably in collecting the Asian and Native Hawaiian or Other Pacific Islander NHOPI categories. Census data and public health surveillance data have been historically interdependent. The absence of scientific consensus on the nature of race and its relation to ethnicity has created further difficulties for public health surveillance.

## Federal :: Standards for Maintaining, Collecting, and Presenting Federal Data on Race and Ethnicity

Table 3: Summary of testing for the national identity, ethnic group, religion and language topics, 2016 to 2020 Reference Date of Testing Type of Testing and sample size 2016:1 March 2016 Qualitative: 30 user experience UX tests and cognitive interviews.

## 3. Defining Categorization Needs for Race and Ethnicity Data

Questionnaire changes would have to be approved by the Office of Management and Budget, which determines and defines the race and ethnicity categories.

## Ethnic group, national identity and religion

What this study adds This research attempts to engage with current debate in how individuals engage with telephone based healthcare, and highlights how a relatively new innovative service has engaged ethnic sub-groups of the population since its inception. Retrieved May 26, 2009, from

## U.S. Census looking at big changes in how it asks about race and ethnicity

During the 1990s and beyond, the validity of the concepts of race and ethnicity will become more critical as public health surveillance shifts to monitor individual characteristics and behaviors associated with specific diseases and to accommodate culturally appropriate intervention models.

This is a huge demographic shift in the population.
