## Articles politiques

And are there any important economic struggles which do not become political right from the start as a result of government intervention? Obviously all anarchists and socialists understand the economic facts of life which today oblige man to struggle against man, and any observer will see the importance of a personal struggle against the overwhelming power of the present social environment. Thus he endorsed such broad alliances in Italy when civil liberties were threatened during the 1890s, during the road to Fascism in the early 1920s, and under the Fascist regime from his condition of near-house arrest in Rome from 1926 to his death in 1932.

Let the Russian experience serve as a lesson.

**Errico Malatesta, politiques : Idées, organisation et pratiques / AvaxHome**

Money and Banks It is a mistake to believe as some do that the banks are, or are in the main, a means to facilitate exchange; they are a means to speculate on exchange and currencies, to invest capital and make it produce interest, and to fulfil other typically capitalist operations, which will disappear as soon as the principle that no one has the right or the possibility of exploiting the labour of others, triumphs.

## Life and Ideas: The Anarchist Writings of Errico Malatesta

Whoever has power over things has power over men; whoever governs production also governs the producers; who determines consumption is master over the consumer. The Occupation of the Factories General strikes of protest no longer upset anybody; neither those who take part in them nor those against whom they are directed.
